60 Second Face Lift – Look Years Younger in Only 60 Seconds?

60 Second Face Lift – Look Years Younger in Only 60 Seconds?

The [Viki Lamottas' 60 Second Face Lift](#) is also commonly referred to as Wonderlift, and claims that you can look years younger in one minute. Designed to reduce crow's feet, fine lines, sagging, lines on the forehead, and wrinkles, this product has gotten some criticism in recent years from those who don't believe the product can do as it claims. If it can really make you look years younger in such a short amount of time remains to be seen, but read below to learn more.

Ingredients

This company is a little tight lipped when it comes to the ingredients contained within their product. However, the 60 Second Face Lift does contain Vitamin B, collagen, and aloe, which have all been shown to be beneficial in restoring skin elasticity and reducing wrinkles.

Although many of the ingredients are not known, what is known is that the mixture is 100% hypoallergenic, which means that it is safe for those with allergies. This alone can set it far above other products in terms of universal usage.

Advantages

One of the main advantages of the [60 Second Face Lift](#) cream is that it is hypoallergenic and can be used by people with allergies. It can also be ordered easily online through a secure connection, and it does come with a 30 day money back guarantee that it will produce positive results.

With only one solution to apply, it is simpler than other systems that contain multiple products, and it is less expensive than other creams on the market as well.

Disadvantages

A huge disadvantage of this product is that they make a big claim and don't really have any proof to back it up. It claims to remove wrinkles in 60 seconds, but other than a few pictures and statements on their website there is no proof.

The solution is also very thick, and it must be shaken up before it is applied. If it is applied too thick then there is also a residue that is left behind, and could cause problems as far as your makeup is concerned.

Cost

At only \$39.95 for a 1 ounce bottle, the [60 Second Face Lift](#) is quite a bargain when compared with other products on the market. Considering that a small bottle can last you a little over a month, this is an incredible value. Even if the product does not work as described, it can still produce beneficial results that are well worth the price.

Who Would Benefit Most From This Product?

For anyone on a budget, and who is searching for a way to potentially reduce wrinkle instantly, the 60 Second Face Lift would be ideal. It is also a good alternative for those who do not want to chance riskier procedures that have harmful side effects. For those with allergies, few other anti wrinkle products are hypoallergenic as this one is, so you would more than likely benefit from its use as well.

The 60 Second Face Lift does not reveal a lot of its secrets, and although it's radical claims have not been proven they have not been disproven either. If you have a low budget for wrinkle reduction, this could be just the product you need. With a 30 day money back guarantee, you really have nothing to lose.
